

Roach Spray Preparation

- ☐ **DO NOT SPRAY AEROSOL INSECTICIDES**

Preparation for Treatment

- ☐ Empty all cupboards and drawers in your kitchen and bathroom.
- ☐ Empty your oven drawer.
- ☐ Remove all items from countertops
- ☐ Non-food items can be placed in another room and covered with a sheet.
- ☐ All food must be in the fridge or in sealed plastic containers.
- ☐ Vacuum, mop or dry sweep the kitchen floor.
- ☐ Leave your appliances in place (fridge, stove, microwave, etc.)
- ☐ Wipe down kitchen counter on the morning of treatment.

Post Treatment

- ☐ Unit must be vacant for 5 hours.
- ☐ For anyone with breathing difficulties, pregnant women or newborn babies, do not return for 18 hours.
- ☐ Wipe down any areas where you eat or prepare food, other areas should be dry wiped only.
- ☐ Do not leave any food out in kitchen.
- ☐ When cleaning the floors in your kitchen and bathroom please don't use cleaning products or vacuum on the baseboards, instead it is advised to dry mop.
- ☐ Keep kitchen clean and tidy for at least three weeks.
- ☐ You should start to see immediate improvement, but roaches may still be seen for 10-14 days.
- ☐ If the problem persists past 14 days, please speak with your property manager or management office.
