

Bedbug Treatment Preparation

- ☐ **DO NOT SPRAY AEROSOL INSECTICIDES**
- ☐ **DO NOT remove furniture.**
- ☐ **DO NOT sleep in separate area of your home, as this will make the bedbugs spread**
- ☐ **DO NOT sleep on mattresses on the floor, always have a proper bedframe if possible.**

Preparation for Treatment

- ☐ Remove all items from bedroom and living room area floor (toys, clothing, small items).
- ☐ Remove and wash the following in hot water, and place in dryer at highest setting for at least 45 minutes:
 - All bedding
 - Fabric curtains
 - Clothing
 - Pillows, comforters and items that can't be washed should still be put in dryer.
- ☐ Clear and empty all dressers and bedside tables. Inspect and seal belongings, place in bags or plastic containers. *****Keep items in the bags until we clear you to unpack them.***
- ☐ Thoroughly vacuum floors, mattress, boxspring, furniture and blinds. Bag and discard vacuum contents immediately.

Day of Treatment

- ☐ Remove all bedding from bed
- ☐ Remove all items from floor area.
- ☐ Beds, couches and chairs should be left in place with nothing on them

Post Treatment

- ☐ Bedbug treatment may take two or more visits, do not unpack your items until you are told to do so.
- ☐ Do not vacuum or mop around the baseboards or around the beds.
- ☐ Do not return to your unit for at least 5 hours after treatment.
- ☐ For newborns, pregnant women, and anyone with breathing difficulties, units should remain vacant for 18 hours.
